

ICZ LETVIS® - ORS

Objective Recording System

A SYSTEM FOR THE OBJECTIVE RECORDING OF OPERATOR ACTIVITY

THE ICZ LETVIS® ORS (OBJECTIVE RECORDING SYSTEM) PRODUCT ENABLES OBJECTIVE RECORDING (IMAGE AND SOUND) OF THE ACTIVITIES OF AN OPERATOR PERFORMED AT A MONITORED WORKSTATION, AND THEIR SUBSEQUENT REPLAY.

The ICZ LETVIS® ORS product is a system enabling the objective recording of the activities of an operator at a workstation in the sense of recording the image displayed on a monitor and analogue voice communication (and potentially other audio information) into a single multimedia recording. It can archive, search and replay all recordings.

Objective recording records complete and non-modified source (digitised in the case of audio) data. The recorded picture can be replayed on a monitor with different resolution than the original unit, either with a 1:1 aspect ratio with cropping and focusing on a specific part of the image, or with the display of the image over the whole screen with suitable modification.

[BASIC FUNCTIONS]

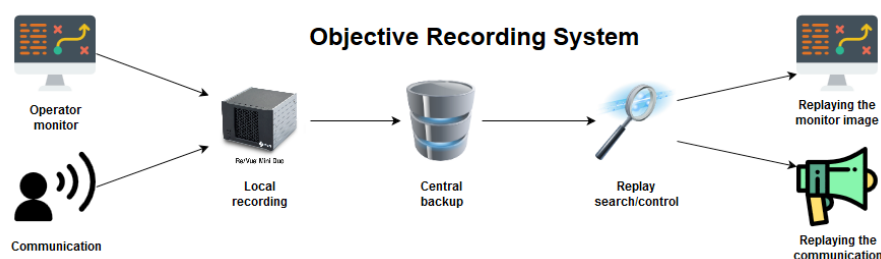

Objective recording of the activities of an operator:

- ▶ Recording the image displayed on a monitor
- ▶ Recording audio information
- ▶ Central backup

Replay and work with recordings of the activities of an operator:

- ▶ Recordings management (search, deletion, etc.)
- ▶ Replaying recordings
- ▶ Replay search/control
