

ICZ LETVIS® - TCM

Technical Control & Monitoring

TECHNICAL CONTROL SYSTEM FOR THE ICZ LETVIS® SYSTEM

THE ICZ LETVIS® TCM (TECHNICAL CONTROL & MONITORING) PRODUCT ENABLES TECHNICAL MONITORING OF ICZ LETVIS® SYSTEM STATUS.

The ICZ LETVIS® TCM product is a system enabling technical monitoring of individual servers and workstations in terms of operating system. It checks for functionality, performance and connection of individual servers to the ICZ LETVIS® system. It also provides a brief information about the status of the monitored application. The TCM enables technical supervision of the status of the ICZ LETVIS® system.

[BASIC FUNCTIONS]

Technical monitoring of the status of workstations and equipment

- ▶ Collecting, recording, distributing, and browsing data about the state of workstations and equipment (CPU, network adaptor, disk, memory usage, etc.) in the ICZ LETVIS® system (ICZ LETVIS® TCMser)
- ▶ Collecting, recording, and distributing data about the state of applications in the ICZ LETVIS® system (running/not running, selected current application data, etc.)

Graphical user interface

- ▶ User client (ICZ LETVIS® TCMcl)
- ▶ Display of the current state of workstations and equipment
- ▶ Search and display of historic events
- ▶ Launch of helper applications and clients (network pinging, terminal, etc.)

[ICZ LETVIS® - TCM]

■ APPLICATION SW AND OPERATING SYSTEM

OPERATING SYSTEM	LINUX SLED/SLES 12 (X64) AND HIGHER
Application SW	The ICZ LETVIS® TCM SW product includes: <ul style="list-style-type: none"> ▶ TCMser process ▶ TCMcl client

■ HARDWARE AND TECHNICAL PARAMETERS

Basic HW	HP/DELL/COTS – INTEL platform
Data record format	ALES-FDR-D, ALES-FDR-V
Network protocols used	TCP/IP
Maximum number of monitored workstations	128
Maximum number of monitored applications	64 per workstation
